

CHAPTER 6: OTHER CEQA CONSIDERATIONS

As indicated in Chapter 4, the following chapter discusses the cumulative impacts, significant unavoidable environmental effects, significant irreversible environmental changes, and growth-inducing impacts of the proposed project, as required by CEQA.

Cumulative Impacts

The proposed impact will not create any cumulative impacts. There is no evidence that there are other closely related past or present projects, or reasonably foreseeable probable future projects, in the project area that would cause impacts related to the proposed project. Any cumulative impacts caused by wild turkey hunting are discussed in the Department's Resident Game Bird Hunting Environmental Document (available from the Department upon request).

Significant Unavoidable Environmental Effects

The proposed project will not have any significant environmental effects which cannot be avoided if the project is implemented. This determination is based upon this document's conclusion that the project will not have any significant environmental impacts.

Significant Irreversible Environmental Changes

The proposed project will not cause any significant environmental changes. This conclusion is based upon a determination that the project will not make an irretrievable commitment of resources, either renewable or nonrenewable.

Growth-Inducing Impacts

The proposed project will not have any growth-inducing impacts. This is based upon a determination that the project will not foster economic or population growth, nor will it facilitate the construction of additional housing in the surrounding environment. Additionally, there is no indication that the proposed project will encourage or facilitate other activities that could significantly affect the environment. Although there is a possibility that an increase in wild turkey populations will attract additional hunters into the area, all potential effects of hunting activities are discussed in the Department's Resident Game Bird Hunting EIR (available from the Department upon request).
